Summary

- **HFI Certified Usability Analyst** Currently Principal AI Design Architect & UX Owner at Robert Bosch, driving healthcare, energy and multi-market business.
- **13+ years** Strong technical foundation in user research, interaction design, visual design, rapid prototyping, and design systems.
- Shaped brands and products for Fortune 500 companies including **Bosch, ExxonMobil, Intel, Honeywell, and L&T**.
- Well-versed in driving **UX transformation, strategy, and maturity** across organisations.
- Recognised for leadership in team management, mentoring designers and design management practices.
- Possess global exposure and cultural adaptability, with onsite experience in the Gulf, USA, and Europe (**holds valid business visas for the USA and Europe**)

My Domain Expertise

I have expertise in applying user-centric design across diverse industries:

- **Healthcare** – Designed patient-focused digital platforms and AI-driven health solutions to enhance care experience in healthcare.
- **Oil & Gas** – Applied design thinking to streamline workflows, improve efficiency, and enable data-driven decisions to complex oil and gas business processes and enterprise applications.
- **Smart Building Solutions** – Crafted intuitive interfaces that enhance smart building automation, sustainability, and overall occupant experience.
- **Multi-Market (*Home Comforts, Power Tools, Factory of the Future*)** – Drove cross-domain design strategies to deliver scalable, adaptable, and future-ready user experiences.

My Skills & Core Competencies

- UX Research
- Interaction & Visual Design
- Information Architecture
- Wireframing
- UX Maturity
- Usability Testing
- UX Leadership & Team Management
- Design Thinking Facilitation
- Service Design
- UX Transoformation and Maturity
- Design Mentorship
- Business Process Design
